

1) HOVERCRAFT

A hovercraft hovers/flies above the air cushion beneath the craft which makes it usable on any kind of surface including, water, swamp, mud, land and ice. The magic in our hovercraft is that it is the first of its kind which can brake and reverse. It is superbly designed and made!

We have a range of hovercrafts to meet the needs of customers, from small 4-seater up to 180-seater vehicle. Today we bring you the most maneuverable of all which is the hovercraft model HT1425.

- 145HP, 4 stroke
- Unsinkable
- Max speed 60mph (96kmh)
- Hull made out of Kevlar & Carbon
- With brake and reversing system

2) AIRBOAT

The Airboat ABR630 is the apex of the achievement of HTI in the study, design and development of highly mobile craft, work that began in 1995 with the hovercraft range.

- Dry weight of only 450 kg
- Powered by a 4 stroke engine generating 260 HP.
- Cruising up to 96 km/h with reaction time of 2 seconds.
